EXPERIENCE

MERN Stack Intern

R3 SYSTEMS INDIA PRIVATE LIMITED

Jan 2023 – Feb 2023

Shirpur

- During this internship I got to learn several concepts about MongoDB, Express.js, React.js, Node.js and other technologies.
- Assisted in the design and implementation of RESTful APIs to facilitate seamless communication between the frontend and backend components.

Java Intern

R3 SYSTEMS INDIA PRIVATE LIMITED

July 2022 – August 2022

Shirpur

- During this internship I got to learn several concepts about Core Java, Advanced Java, Java Database Connection(JDBC) and Java Servlet Pages(JSP). And with that learning I have made a Project named- Black Spot Detection.

PROJECTS

Bank Management System

- A Bank Management System project in Java is a software application designed to handle various banking operations and activities efficiently.
- This project is related to banking system. In this projects there are 2 modules admin and customer. Admin can create customer account, delete account. Customer can amount deposit and amount withdraw.

Black Spot Detection

- Black Spot Detection project in Java aims to identify and analyze hazardous locations on road networks, commonly referred to as "black spots," where the frequency of accidents is notably high.
- This project is basically used to detect crime and accidental spots. Made using java Server Page and Database management.

Personal Portfolio

- Designed and developed a personal portfolio website using React JS, showcasing my skills, experience, and projects. Improved front-end development skills while creating a professional online presence.

Electronic Shopping Website

- An electronic shopping website built with React.js is an online platform that allows users to browse, search, and purchase electronic products such as smartphones, TVs, Washing Machine, cameras, accessories, and more.
- React.js, being a powerful JavaScript library for building user interfaces, enables the creation of a dynamic and interactive e-commerce experience for users.
